Step 2 Preliminary SI Level by Total Score on Domains I-V

1. *Preliminary SI Level by Total Score on Domains I-V. Total Score:*
(Please select one.)
 - (6-8) - SI Level 0
 - (9-12) - SI Level 1
 - (13-17) - SI Level 2
 - (18-22) - SI Level 3
 - (23-26) - SI Level 4
 - (27-30) - SI Level 5
-

Step 3 Application of Independent Criteria

1. *Action if ECSII Domain Score is 5*

- I. Degree of Safety -- Moves to Level 5
 - II. Child – Caregiver Relationships -- Moves up 1 Level (only 1 level raised if Domains II and IV are both rated 5)
 - IV. Functional/ Devel. Status -- Moves up 1 Level (only 1 level raised if Domains II and IV are both rated 5)
-

Step 4

1. *ECSII SERVICE INTENSITY LEVEL*

Step 5 SERVICES** PROFILE SCORES

Instructions: (** Consider one SI level increase if sum of three Services Profile scores = 12 or above)

1. *(A) Child Involvement*

2. *(A) Caregiver Involvement*

3. *(A) Involvement Score*

4. *(B) Fit*

5. *(C) Effectiveness*

6. *Explanation if final disposition differs from the ECSII-derived SI Level*

STEP 5

Instructions: Services Profile (SP) scores (Domain VI) do not usually change the ECSII SI Score, but are important considerations for individualized service planning. The SI Level may move up 1 level if the sum of SP scores = 12 or above; SP scores may also explain an assignment of SI Level different from the ECSII-derived level.
